### **DETAILED ACTION**

1. The Examiner has carefully considered Applicant's amendments and remarks filed on 10/6/2003. Applicant's amendments to claims 38 and 86 have been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Rejections not maintained are withdrawn.

### ***Terminal Disclaimer***

4. The terminal disclaimer filed on 10/6/2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Pat. No. 6,194,062 and any patent granted on the pending Application Nos. 09/715586 and 09/716740 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Response to Amendment***

5. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilbur (US 2338749) in view of the admitted prior art, substantially for the reasons set forth in section 8 of Paper No. 0725, together with the following additional observations.

With respect to Applicant's response arguing that amended claim 1 now requires a storage wrap material to comprise a sheet of non-porous material and the active side

of the sheet of non-porous material is capable of forming a continuous seal (Remarks, page 4, third paragraph), the Examiner repeats (see Paper No. 0725, section 8) that Wilbur expressly teaches that the invention can be embodied in a label, wrapper, envelope or other article of flexible sheet material intended for other uses (page 1, column 2, lines 34-37), and Applicants has admitted that polymeric materials such as PVC, PVDC and PE are commonly used to form cling films (Specification, page 1, 4<sup>th</sup> paragraph), which are inherently conformable and substantially non-porous cling film materials. As such, it would have been obvious to one of ordinary skill in the art of wrapper to select a suitable non-porous cling film material to form Wilbur's wrapper, motivated by the desire to make a thin and conformable wrapper. As to the wrapper being able form a continuous seal, it should be noted that where the claimed and prior art products are identical or substantially identical in structure or composition, or are produced by identical or substantially identical processes, a *prima facie* case of either anticipation or obviousness has been established. See MPEP § 2112.01.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
